

Issue 23

October 2012

New Remote Monitoring feature allows full access to PPMonitor software from any location.

Remote monitoring of data collected by our Wireless IAQ Profile Monitor is now possible using an Ethernet access point. The user can view results and control monitoring schedules and settings on their PC/Laptop thousands of miles away from the monitoring location.

Amongst the possible applications of remote monitoring is the data being sent to a central location, where data is collated from multiple instruments placed in numerous buildings in a complex, city or region.

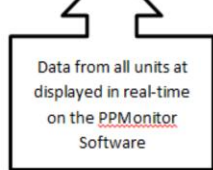

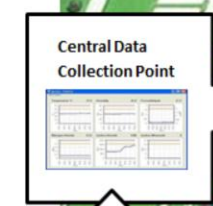

For more information please contact – info@ppm-technology.com

The below diagram is an example of monitoring IAQ on a single site with many buildings and many monitoring locations.

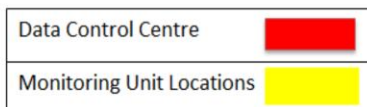

If you have any relevant stories, including any recent or upcoming exhibitions, application stories or customer testimonials that you want to be included in the next newsletter please feel free to contact us:

Wireless IAQ Monitoring units transmit sampling results for up to 7 IAQ parameters at each location. Data is sent via Ethernet access point to the data collection location. Sampling results are displayed in real-time on the PPMonitor Software.

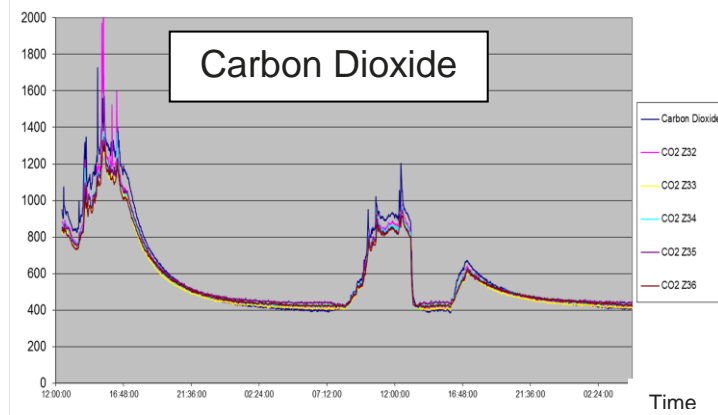

Intellectual Property Audit results.

PPM recently held an 'IP Audit' - the audit reviewed all of the company's Intellectual Property rights including Trademarks, Copyright, Logo, Company name and website.

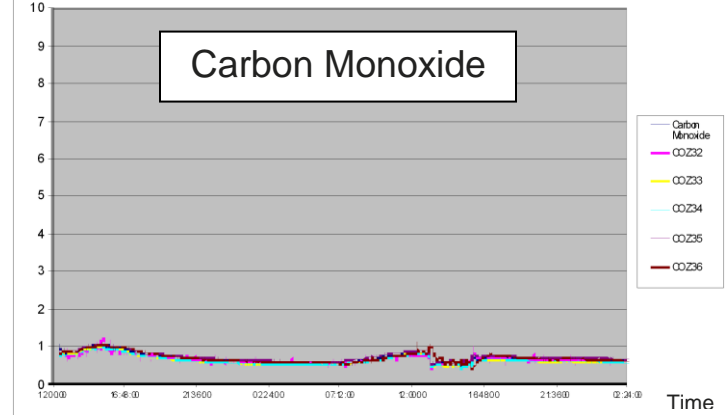

If you would like to receive the audit please contact – info@ppm-technology.com

Testing of instruments show excellent accuracy and performance.

Recent testing of six IAQ monitoring instruments with sensors for Carbon Dioxide, Carbon Monoxide, Formaldehyde, Nitrogen Dioxide, Humidity and Temperature over a sampling period of 38 hours showed excellent consistency and accuracy in the sampling results as demonstrated in the above graphs.

For more information regarding our IAQ instruments feel free to contact us at info@ppm-technology.com

Customer Satisfaction Survey

Our recent Customer Satisfaction Survey has returned good results, but has demonstrated there is room for improvement. Overall customer satisfaction was 81.40%. Individual scores for certain aspects of the business were – Marketing 72%, Staff Performance 87%, and Products and Services 82%.

We will use the feedback of our customers to improve future performance and procedures. We are disappointed with the number of replies we received; we are open to suggestions to improve our procedures for receiving customer insights and feedback.

Taiwan: Venues unprepared for new air quality standards.

Taiwan's Indoor Air Quality Management Act is taking effect on Nov. 23, a survey shows that more than half of regulated public venues are not prepared for nor understand the regulations, legislators said yesterday.

Stipulating that owners, managers or employers of mass gathering spaces are responsible for ensuring good indoor air quality in the venues, the act was passed by the legislature and promulgated by the president in November last year, and was scheduled to take effect one year after.

We believe this legislation will lead to greater demand for IAQ monitoring equipment in Taiwan; our IAQ monitoring instruments can be used for monitoring many of the parameters legislated by the IAQ Management Act.
